

## AZ-104T00 | Microsoft Azure Administrator

---

**Duration Course:** 32h

### Audience profile

This course is for Azure Administrators. The Azure Administrator implements, manages, and monitors identity, governance, storage, compute, and virtual networks in a cloud environment. The Azure Administrator will provision, size, monitor, and adjust resources as appropriate.

### Prerequisites

Successful Azure Administrators start this role with experience in virtualization, networking, identity, and storage.

- Understanding of on-premises virtualization technologies, including: VMs, virtual networking, and virtual hard disks.
- Understanding of network configurations, including TCP/IP, Domain Name System (DNS), virtual private networks (VPNs), firewalls, and encryption technologies.
- Understanding of Active Directory concepts, including users, groups, and role-based access control.
- Understanding of resilience and disaster recovery, including backup and restore operations.

### Course Modules

**Module 1:** Identity

**Module 2:** Governance and Compliance

**Module 3:** Azure Administration

**Module 4:** Virtual Networking

**Module 5:** Intersite Connectivity

**Module 6:** Network Traffic Management

**Module 7:** Azure Storage

**Module 8:** Azure Virtual Machines

**Module 9:** PaaS Compute Options

**Module 10:** Data Protection

**Module 11:** Monitoring
