

PL-300T00 | Microsoft Power BI Data Analyst

Duration Course: 24h

Overview

The audience for this course are data professionals and business intelligence professionals who want to learn how to accurately perform data analysis using Power BI. This course is also targeted toward those individuals who develop reports that visualize data from the data platform technologies that exist on both in the cloud and on-premises.

Prerequisites

Successful Data Analysts start this role with experience of working with data in the cloud.

Specifically:

- Understanding core data concepts.
- Knowledge of working with relational data in the cloud.
- Knowledge of working with non-relational data in the cloud.
- Knowledge of data analysis and visualization concepts.

You can gain the prerequisites and a better understanding of working with data in Azure by completing [Microsoft Azure Data Fundamentals](#) before taking this course.

Course Modules

- **Module 1:** Get Started with Microsoft Data Analytics
- **Module 2:** Getting Data in Power BI
- **Module 3:** Cleaning, Transforming, and Loading Data in Power BI
- **Module 4:** Design a Data Model in Power BI
- **Module 5:** Create Model Calculations using DAX in Power BI
- **Module 6:** Optimize Model Performance in Power BI
- **Module 7:** Create Reports in Power BI
- **Module 8:** Create Dashboards in Power BI
- **Module 9:** Identify Patterns and Trends in Power BI
- **Module 10:** Create and Manage Workspaces in Power BI
- **Module 11:** Manage Files and Datasets in Power BI
- **Module 12:** Row-level Security in Power BI
